

## Erratum to the Printed Version

On “The Three-dimensional Complex Space theory” page 192, should read:

...

The values theoretically calculated on TCS<sub>PM</sub> for universal constants correlated with the inertial mass are:

Electro-gravitational constant ( $k_{GE}$ )	$2.88821919179004 \times 10^{-10} \text{ N.m}^2.\text{kg}^{-2}$
Magneto-gravitational constant ( $k_{GM}$ )	$3.57558690249434 \times 10^{-44} \text{ N.s}^2.\text{kg}^{-2}$
Speed of gravitational waves ( $c_G = \{k_{GE} / k_{GM}\}^{1/2}$ )	$8.98755178736818 \times 10^{16} \text{ m.s}^{-1}$
