Abstract

Lord Prof PhD Momtchil Dobrev-Halachev developed 2008 "Theory of generating of crises" and 2001 "Theory of the mafia". Based on these two theories, this paper explains the establishment of the financial crises in Greece.

Keywords: crise, mafia, corruption, theory, finance

1. Introduction

In the year 2008 Lord Prof. Momtchil Dobrev developed the "Theory of generating crises". The theory of generating crises has been developed by analyzing all the relationships between countries, and lysing the causes and consequences of crises. The theory examines all possible options for generating crises. The theory ultimately leads to the conclusion that each crisis begins on the basis of a conscious action, whether of a state, of a government, of financial circles, of a president of one or more countries, of financial actors, of the financial market, stock markets, financial institutions, private interests.

All the factors that triggered the crisis in Greece, the conditions of neoliberalism, globalization that helped the crisis, the conditions in Greece, the development of the public debt, its increase, the presence of corruption and mafia at the different levels of government in Greece. In the paper are described the real reasons for the start of the financial crises in Greece.

The problem of the emergence and financial crisis in Greece is very important. The credibility of the causes of this financial crisis in Greece is vital to any country and government. The study, based on Momchil Dobrev's Theory of Crisis Generation, which gives a different view of the causes and consequences of the financial crisis in Greece. Here is the view of Momchil Dobrev that underlying the cause of the financial crisis in Greece is the accumulation of unjustified foreign debt, the taking of ever more loans for the purchase of weapons and defense, under the pretext that the country Turkey and the enemy armed and accumulated more weapons from one side and, on the other hand, the corruption schemes of politicians and government as well as the interests of financial circles from other countries and the interests of foreign firms from the privatization and purchase of state assets you at Greece at very low prices.

Here Momchil Dobrev's conclusions are relevant, based on his theory of crisis-generating, which proves that there is a clear link and the follow-up of unjustified state borrowing for the purchase of arms, the interests of financial and corporate interests from abroad for privatization and the purchase of extremely low prices of Greek state assets.

These are the real reasons for the financial crisis in Greece.

The importance of revealing the real and real causes of the financial crisis in Greece is of great importance for every state and government. This is important in order to anticipate and monitor such processes and take real measures to prevent such crises.

Preventing, tracing and preventing such crises is important for the stability of financial, economic, social, public structures, the stability of a single state, entire continents, economic alliances.

To solve the problem, according to Momchil Dobrev Dobrev, analysis of the volume of arms sales, auxiliary equipment, money for troop servicing, and the whole process of financing the Iraq war in 2003, is the necessary cause of the global financial crisis. What profits are being made by the whole process and the omission as a result of the available free money in the global financial markets. What is important for solving the problem of accounting for the realized profits is also what is the profit norm in the trade and sale of weapons and equipment from which to deduce the available free money from this process. The whole of this analysis proves to one hundred percent the hypothesis of Momchil Dobrev, which hypothesis is based on the theory developed by Momchil Dobrev - Theory of Generating Crisis.

The thesis of Lord Prof. Dr Momchil Dobrev is that the real causes of the financial crisis in Greece are the accumulation of early loans for the purchase of weapons and other unnecessary equipment and assets, the interests of financial circles and foreign corporations, especially German and American, for the acquisition of state assets by Greek state-owned companies under low-priced privatization and corruption at state level.

So far, no one in the world has looked at the dependence of unjustified state borrowing, corruption in the state, and the interests of financial corporations and foreign corporations from privatization and the acquisition of low-cost state assets and the real buy-out of a country by foreign firms.

To prove his thesis that the financial crisis is caused by these factors in Greece, Lord Prof. Dr. Momchil Dobrev is stepping on his theory of crisis generation, data and information on the realities in Greece, its government the interests of foreign firms.

2. Research Methods

The research methods are the analysis of the facts in Greece, the development of Greece and the management of Greece for the last decades, the analysis of which foreign companies enter Greece, create partnerships with state-owned companies, under what conditions and others, the analysis of the Greek realities, of Neo-Liberalism and Globalization to Accelerate a Financial, Economic, Social, Social Crisis in a Society and Country

2.1 Analysis of the Facts about Greece

In Greece there are all the main features of neo-liberalism - namely - the government does not interfere in the economy at all, Left the market itself to determine the rules, and, on the other hand, the high-cost social system available - in the field of public administration in healthcare.

All the governments of Greece knew that at one point the state would not be able to service its debts.

In neoliberalism, the world and domestic markets are the main driver of economic development.

Different countries have different levels of economic development.

The different degree of competitiveness.

The economies of developed countries produce cheaper, produce more and better, and thus impose their output and thus conquer the markets of the smaller ones rather than the developed countries.

This is a process of pardoning poverty.

Neoliberalism raises in a natural way using the political system and political parties to impose a financial oligarchy.

The generation of the crisis in Greece is on the basis of the burned large state debt in the social system, health and state and another administration.

Initially, ad-ministration grew from 21,000 to 200,000. As a consequence, the administration grew to 800,000 clerks. This required and required a cost for this bureaucracy amounting to 14 billion a year.

There is an enormous corporation and robbery.

2.2 Analysis of the Basic Environments for Crisis Increase – Neo-Liberalism and Globalization

Neoliberalism around the world leads to globalization of the world economy There is a cyclical nature of production and crises are preserved. Crises become increasingly honored. Crises are getting harder to overcome

Progressive technologies are developing and there is a strategic superiority of certain states over the rest of the world.

Globalization has led to the full exploitation of small peoples by large peoples. The Neoliberalism and globalization are bringing the peoples closer, but they are actually moving away from them, and the real enslavement of one country over others. They are approaching the near-developing countries, which makes the

respective crisis immediately affecting all the other countries that are in this industrial and other development. Smaller countries are affected by lagged lag and in smaller degrees.

Countries in the world are not at the same level of development, whether industrially or spiritually and culturally. In neoliberalism, the world and domestic markets are the main driver of economic development.

Different countries have different levels of economic development. The different degree of competitiveness.

The economies of developed countries produce cheaper, produce more and better, and thus impose their output and thus conquer the markets of the smaller ones rather than the developed countries. This is a process of pardoning poverty.

Neoliberalism raises in a natural way using the political system and political parties to impose a financial oligarchy. The Financial Oligarchy manages governments and countries respectively.

In turn, the interweaving of financial interests and politics is generating not only the financial oligarchy but also the corruption and mafia in the state at all levels.

The financial oligarchy, the big corporations hold and thus the government in the elite state.

In neoliberalism, there can not really be a civil encyclopedia and a robbery to control the government.

In fact, governments are creating such laws to protect certain corporate interests, support tactics, enforce and legitimate corrupt practices, enforce laws that exclude real civil society, genuinely enforce laws to legalize mafia in governments, and financial mafia.

Indeed, governments are creating and adopting laws that legitimize thefts, corruption, mafia, and work in the state.

The media are conquered by certain corporations that govern governments and the state.

The media really can not fulfill their function.

Indeed, manipulation in favor of the financial and oligarchic mafia is done by the media, which prevents other thinking, memory, impose corruption and the mafia as a way of livelihood, governance, organization of society.

The media are heavily dependent on oligarchs and the oligarchic mafia.

The oligarchic mafia manages governments, and thus the whole states.

The Goal is Globalization to Become Controlling - Which the Oligarchic Mafia will not Allow Niko | Ga.

There is no specialization of a particular country to compete in other countries.

Necessary Specialized and Controlled Globalization.

Consumers' society is only in the interest and profitable only for developed countries.

In this way, they place their goods and services in the contiguous countries for a long period of time.

2.3 Analysis of the Real Reasons of the Financial Crises in Greece

The Basic Process of Generate a Crises in Greece - The Borrowing of Government Debt from Political Mafia Benefit from Financial and Other Media - Main Reason for the Greek Crisis

The Goal is the Privatization of the Greek Companies in Greece

On the Basis of the "Criticizing Theory" of Momchil Dobrev Dobrev

The state statistics about the the state depts during the differenet governments show the following data:

-1974 - after the fall of the junta in Greece, the New Democracy government inherited a debt of 337 million euros.

-1981 - the ND government hand over to PASOK a debt of 2 billion euros.

-1989 - The PASOK government hand over to the ND a debt of EUR 32.2 billion.

-1993 - the ND government handed over PASOK a debt of 75 billion euros.

-2004 - the PASOK government hand over to the Sun a debt of € 180 billion.

-2009 - the ND government handed over to PASOK a debt of 300 billion euros.

-2011 - the debt is over 352 billion euros.

The state's VAT losses from street trade alone amount to more than 7 billion euros per year. Military costs are

about 8 billion a year. These costs are increasing each year, scared by the fear of a possible war with a possible enemy. In practice, the financial mafia raises government debt by increasing the cost of arms and debt and the peoples concerned.

Excessive state administrative apparatus. After each electoral victory of any party, the appointments in the state administrative area were between 160 and 300 thousand.

Their number is over 1 million and 200 thousand.

Greece's banking system has concentrated the bulk of Greek funds for production.

Greek citizens are second in deposits in "Swiss coins". There are 16 million tourists in Greece each year. There are black currencies and black capital - uncollectible, hidden from taxes and charges.

Greece owns 2400 large tankers and cargo ships.

Greece is the world's second largest producer of sheep's milk,

The first is in the production of olives, saffron, kiwi and peaches.

Greece is first in the production of niche, magnesium magnesite - 1.6 million tons,

Greece is second in the world is producing bentonite 1.5 million tons.

Greece ranks first in the production of bauxite - 2 174 000 tonnes. In Greece are the three largest golden hills in Europe. Stocks of oil and natural gas amounted to \$ 10 trillion

Macroeconomics does not take into account - what is the profit rate. Whether this profit rate is invested back and in what amount and share. All revenues and savings are treated in a variety of industries one by one - That does the weak.

Moreover, there are schemes to lawfully conceal profits - through so-called offshore companies.

In the different industries of the economy have also various levels of profit. Thus, for example, in the military production sector, the profit rate ranges from 30 to 70%. This is the industry with the highest profit rate. In light industry, the profit rate is about 5-10% - we talk about tolling. Food industry profits vary between 15-25 percent. But also in terms of relative volume and sales of weapons and ammunition are the largest.

Here are the wrong conclusions of macroeconomics for a given state of the planet's economy.

Here are the wrong conclusions about the consequences.

A distinction must be made between which sectors are state-owned and which sectors dominate private companies.

The generation of the crisis in Greece is based on the growth of the large state debt in the social system, health and state and another administration.

Initially, ad-ministration grew from 21,000 to 200,000. As a consequence, the administration grew to 800,000 clerks. This required and required a cost for this bureaucracy amounting to 14 billion a year.

There is an enormous corporation and robbery.

The crisis in Greece also involved major corruption and robbery, as well as the oligarchic mafia, which has created corrupt practices as a robbery for state property.

There is political corruption that works in this direction, creating a tremendous public debt, and then certain financial environments from abroad to privatize the riches of GREECE.

In Greece, different German companies and corporations are imposed on political grounds. These same companies are imposing corrupt practices.

It is no accident that German companies and the German state hold the bulk of Greek debt

From the above lines, we have seen repeatedly that Greece is a very rich country.

The largest chains of hypermarkets, Praktiker, Ikea, Liddel, Carrefour and others over 160 million euros a week leave Greece. "Small and medium-sized manufacturers are being destroyed. This don

From the above lines, we have seen repeatedly that Greece is a very rich country.

The largest chains of hypermarkets, Praktiker, Ikea, Liddel, Carrefour and others over 160 million euros a week leave Greece. "Small and medium-sized manufacturers are being destroyed. This leads to a gray economy.

Prices are twice as high as those in Brussels and Strasbourg than in Greece.

Germany's German companies are interested in privatizing state-owned Greek firms whose assets are worth hundreds of billions of dollars at ten times lower prices, proving the long-handed political mafia, which was aimed at privatizing Greece's assets, mostly by German and American companies .

The interests of other countries, for example, France are in trade deals and, most importantly, in arms deals.

The Mafia is at an international level.

2.4 Analysis of the Purpose of the Financial and Other Institutions and Companies of the Acquisition of the Government Assets in Greece by Foreign Companies and Financial Institutions

Crises in Greece - Nalysis of the purpose of the financial crises in Greece - acquisition of the government assets of Greece by foreign companies, financial mafia. For this purpose, political and financial mafia works both from abroad and in Greece itself. The whole process is driven by these circles - the political and financial mafia, which includes corporate interests. The aim is to involve Greece in a state debt crisis, with the result that the assets of the whole country from foreign companies. For this purpose, political and financial mafia works both from abroad and in Greece itself. The whole process is driven by these circles - the political and financial mafia, which includes corporate interests. The aim is to involve Greece in a state debt crisis, with the result that the assets of the whole country from foreign companies.

2.5 Analysis of Availibilty of Corruption and the Mafia in Greece

Nalysis of available of corruptia and the mafia in the Greece.

The elements of the Momtchil Dobrev D. "Theory of the mafia" and the political model of mafia in Europa and for example in Greece.

In this part we will consider the basic elements, the relationships in the theory of mafia seen in the last 20 years in the experience of the author in connections of the given situation in the state Greece. The described below is the short description of the theory of the mafia the vision of the author for creating the theory of the mafia, its building and life and related to the crises in Greece.

Behind the basic alements of the theory of the mafia are described also concrete appearances.

Elements of the Theory of the mafia are the following:

Structure of the mafia. It includes structures that they depends of the formula of the mafia:

Structural subordination. This is available also for the outside structure most described as organizational criminal group, also for the inside structure – this is a structure of state power, executive power, justice power.

This subordination is boss – employment. The hierarchie is strong and the obligations are executed from the top to the bottom, without comments.

Functional subordination. This type of subordination of members, and others is valid also for the inside structures - the structures in the state, justice and etc. Also for the outside structure – mostly in mafia structures=

The structures of the mafia are: outside structure – for the criminal groups, and inside structures – for the state, justice, execution power.

Connections. There are some types of connections between these structures – the inside and the outside which are the structures of the mafia.

Connections between outside structures. Connections between inside structures. Connections between inside and outside structures.

The availability of the mafia action is the condition of availability of ORDER/ The order will be executed based on:

- subordinations – structural and functional.
- on benefit cooperation * inside and outside/.

Types of the mafia

Inside juridical mafia, inside prosecutor mafia, mafia in the state, mafia in the municipalities, outside prosecutor mafia, outside juridical mafia, outside state mafia. There are procedures of taking in law orders of the mafia in the court, prosecutor office, state and etc.

Formula of the Mafia

The most simple model of the mafia which describes the factors which influence about the amount, type, and etc,

of the mafia is the following:

MAFIA = Power /state and etc./ + Influence + Connections + Interests + ORDER/ORDERS + Mafia structure/ inside or outside/ + Monopoly Rieghts+ laws/ rules/ practices/procedures + possibility of taking an alternative decision – obligation – responsibilities – morality/ethics.

The mafia is available also for the public and private sector. The power of the mafia and the corruption practices in Greece in the public sector are very stark.

The Mafia Process is the interaction the presence of order between the members of the inside structure and group – this is indicated as criminal group, outside structure and members – representatives of inside structuree – for example state structure or member of the state structure – from the state power, juridical power and etc.

All the participant are interested of the execution of the order.

The motivation of the mafia behaviour is also the execution of the functional subordination and the structural subordination with the purpose of benefits such as material and non-material benefits.

The motives of the mafia behavior of member of members of the state public sector in Greece – such as juridical, state, and etc. sector is based of the wishes of prosperity in the structure, the money and also in the functional level also in the material level. These motives are supported from some conditions for the personal public sector as massiveness of corruption practices, corruption procedures, absence of legal channels for material and non-material prosperity, impunity of intruder, possibilities for alternative solutions, fear, concrete pressure and etc.

Some of the typical motives are: - realization of benefits for each economic operation for each members of the action, realization of personal material benefits/for the magistrates, prosecutors, evidance of responsibilities, using of inaccuracy in the judge practice.

The Mafia price is the material or non-material benefits of members of the above mentioned structures. Here is the connection between the mafia and the corruption.

Sphere Spread of the Mafia in Greece

The mafia in Greece can be find in all the spheres of the public live.

Sphere of appearances of the mafia: 1). In the state administration, 2). In the politics, 3). In the justice system, 4). In the police, prosecutor, 5). In the public services, 6). In the private sector, 7). In the TV, radio, television, newspaper, and etc. 8). In the citizen sector.

All these sectors are available in Greece.

2.6 Analysis of the Model of Political Mafia in Greece

The foundation of this operating model of political mafia principle:

Appointed by the mafia that controls a state, ministers, civil servants and others who have data and evidence of wrongdoing in their field of work, crimes in which they have passed each other and one of the mafia has helped them to pass.

These are different cases such as gross violations of tax legislation - tax evasion, concealment of profits, tax evasion, and others - ie held by the officers of the NRA and accordingly entered into force the decisions of the NRA, which crimes in the penal code - various offenses under the Criminal Code under which the pre-trial proceedings were discontinued.

Hidden sexual orientation - Family with children with hidden sexual orientation.

Political mafia based on just these basic as understanding is the following:

- I have appointed and appoint thy family, thy people in state structures
- Preparation of contracts from the eligibility of candidates and requirements of the candidates so close candidate of the party man, to win the contract.
- Preparing the procurement of the conditions, so that only candidate Middle party man to win this contest, auction or other contract.

Political mafia mainly adopt such laws that they do not pursue relevant leaders of state structures, institutions and others. This is the guarantee of the political mafia. It creates laws to make in law violations and their crimes. To legitimize their crimes, and no problems with the justice system - the courts, prosecution, it should political mafia to appoint their relatives Chief Prosecutor for prosecutors at all levels and in all offices across the country.

Political mafia appointed to positions of responsibility in the judiciary and judges loved ones to party mafia leadership positions. Of leadership positions in the courts - the final authority appointed people close to political mafia. This avoids any complaints of crimes committed by people of political mafia in the entire state. It is done at all levels of prosecution. Expressly legislate to not pursue committed by prosecutors and judges crimes mentioned in the constitution if Republic accepted that members not to pursue the commission of offenses by judges and prosecutors. This legitimized lawlessness, corruption, mafia. In the judiciary are appointed judges to serve only orders to give a judgment in favor of our person, our company. By the court and the prosecution is actually legitimize the theft of factories, companies.

By the court and the prosecution is done so that the right people, the right companies mafia in the lists of creditors are claimants and others.

By being anywhere any law of a company or person can not lead a lawsuit against prosecution for its inaction on the reluctance to reveal crimes committed by notaries, the Judges prosecutors?

By being anywhere law a company or person can not lead a lawsuit against prosecution for its inaction on the reluctance to reveal crimes committed by notaries, the Judges prosecutors of companies close to the mafia who steal targets companies with assets worth billions. This is done by pressure from internal services - police, agents, government officials and officials of the National Revenue Agency, tax offices, municipal offices.

Accepted such laws if there is an order from the Mafia to tax and other authorities, including police, the individual can not complained of any institution, structure and you state institutions.

Just political mafia secures not only institutions, government, municipal racketeering and extortion, pressure, squeezing, extortion of embarrassing, but persecution by such institutions only and only to be withdrawn illegally ownership of honest people and companies .

Political mafia in Greece works with financial institutions - banks, insurance companies, pension funds and others. There are also laws that serve the interests of these financial behemoths - banks, insurance companies, agencies, tax authorities and others. Through these financial institutions and laws to be adopted in their favor, using even the structure of enforcement, thus stealing property owned - companies, factories and others on the "inconvenient" individuals and companies. Which does not enter and is not willing to give and transfer property ownership, he is pursued by illegal means as political mafia use any structures -prokurori to raise absurd accusations that prosecutors themselves to commit crimes against civilians just to perform the contract Mafia. If the IRS can not achieve this pressure and racketeering, which lead to a positive result of the mafia, which through racketeering and extortion to perform the contract, it includes not only prosecutors to raise illegal and absurd accusations in making overt crimes. In extreme cases are activated state structures - police and specific individuals to perform the contract - the murder of the "inconvenient" individuals.

To ensure conceal the actions of the mob that is secured in addition to laws and institutions, and employees in all institution should - or state court, but they provide and their possession and control of the media.

Based on this theory of the mafia all the Process made in Greece is made by the mafia.

3. Discussion and Conclusion

The above analyzes lead to the conclusions that prove the thesis of Lord Prof. Dr. Momchil Dobrev that the reasons for the financial crisis in Greece are the accumulation and taking of meaningless loans for the purchase of arms and other assets from Greece corruption in government, the interests of financial crises and corporations from the privatization and buyout of Greek state assets at low prices and the real buyout of Greece from financial and corporate circles.

So far no one in the world has considered the dependence of these factors on the emergence and explanation of the financial crisis in Greece.

The basic process of generate a crises in Greece - the borrowing of government debt from political mafia benefit from financial and other media - main reason for the greek crisis.

The goal is the privatization of the greek companies in Greece on the basis of the "criticizing theory" of Momchil Dobrev.

When certain actions and resolutions certain governments in a country increase unjustified, unjustified, without a specific objective of economy, efficiency, public debt for the benefit of financial environments, certain states and their governments, certain manufacturing companies and others who have clear and proven interest in the privatization of state assets at undervalued prices, this leads to a deep, irreversible, financial crisis, which crisis affects all circles in a society, economic, administrative health a, pension, tax, social, demographic. All these

actions are conscious and incited to the interests of financial interests of statesmen, politicians, political parties.
